Washington, DC 20554

**Re: Notice of *Ex Parte* Presentation in CC Docket No. 94-102**

Dear Ms. Dortch:

On May 17, Polaris Wireless ("Polaris") representative Martin Feuerstein, Chief Technology Officer, and I, counsel to Polaris, met with Erika Olsen, legal advisor to Chairman Martin, regarding wireless E911 issues raised in the above-captioned proceeding. In addition, on May 16, Dr. Feuerstein and Ari Fitzgerald of Hogan & Hartson met with Office of Engineering and Technology representatives Julius Knapp, Alan Stillwell, Ronald Repasi, Ronald Chase, and Ira Keltz.

During the meetings, Polaris provided background regarding its E911 network-based and hybrid technology, including its continuing efforts to improve location accuracy and to test its system in different environments (urban, suburban, and rural). Polaris also expressed its support for the Commission to convene a meeting of the various wireless E911 stakeholders to exchange information and to discuss potential obstacles and solutions to improved E911 access and quality. Finally, Polaris suggested that the Commission consider options to collect and disseminate experimental data regarding potential future enhancements to wireless E911 and related studies from vendors, public safety entities, wireless carriers, and academic researchers.

Please contact me if there are any questions regarding this filing.

Sincerely,

*/s/ Michele C. Farquhar*

Michele C. Farquhar  
Counsel to for Polaris Wireless
